
Content

1 : Abstract	1
2 : Introduction and Foreword	5
2.1) Objectives of the „Energy Rich Japan“ Study	6
2.2) General Framework	8
3 : Methodology	11
4 : Demand Model.....	15
4.1) Industry	17
4.1.1) Agriculture, Forestry and Fisheries	19
4.1.2) The Mining Industry	20
4.1.3) Construction Industry	20
4.1.4) Food and Tobacco.....	21
4.1.5) Fibres	21
4.1.6) Paper and Pulp	22
4.1.7) Chemical Industries	23
4.1.8) Ceramics and Cement	24
4.1.9) Non-ferrous Metals	25
4.1.10) Metal and Machinery	25
4.1.11) Iron and Steel	26
4.1.12) Other industries	28
4.1.13) Summarising the Results for the Industrial Sector in Japan	29
4.2) Residential	32
4.3) Commercial	36
4.4) Transport.....	40
4.5) Combining the Results – ERJ Demand Model.....	44
4.6) Greater Reductions Possible	45
5 : The ERJ Supply Models	47
5.1) Designing the Supply Model	48
5.1.1) Electricity	48
5.1.2) Heat.....	50
5.1.3) Fuels.....	51
5.1.4) Grid Design and Reliability of the System	52
5.2) Energy Sources used in the ERJ Supply Model	53
5.2.1) Solar Energy	53
5.2.2) Hydropower:	58
5.2.3) Wind Energy	60
5.2.4) Geothermal Energy	63

5.2.5) Fuels from Renewable Sources.....	64
5.2.6) Cogeneration Plants	67
5.2.7) Solar-thermal Power Plants	70
5.2.8) Fast Reacting Power Plants	71
5.3) Installed Technologies in Scenario One of the ERJ Supply Model.....	71
5.4) The ERJ Supply Model Scenarios	75
5.4.1) Increasing the Share of Renewables – What is possible?	77
5.4.2) The Scenarios.....	81
5.4.3) Which Scenario offers the Best Solution?	84
5.4.4) Domestic Energy Production in the ERJ Scenarios.....	85
5.4.5) The Use of Hydrogen in a Future Energy System	87
6 : Simulating the Dynamics of ERJ	92
6.1) The ERJ Electrical Demand Model	93
6.2) The ERJ Electrical Supply System.....	95
6.2.1) Fluctuating Energy Suppliers	95
6.2.2) Adjustable Energy Suppliers	98
6.3) The Dynamics of the ERJ Electrical Model	100
6.4) Conclusions of the Simulation.....	108
7 : Conclusions	111
7.1) Demand	111
7.2) Supply	112
7.3) Simulation.....	114
8 : Policy Recommendations	116
8.1) Increasing Energy Efficiency	117
8.2) Supply Side Recommendations	118
8.3) Transport.....	124
9 : References	127
10 : Appendix : SimRen Simulation of the dynamics of energy systems	133
10.1) Necessary temporal and spatial resolution of the simulation	133
10.2) Structure of the simulation model	135
10.3) Course of the simulation.....	137
10.4) The demand model	138
10.4.1) The computational algorithm.....	141
10.5) The energy supply model	145
10.5.1) Simulation of the energy supply components.....	148

10.6) Results	158
10.7) Tests of the modules	159
10.8) Example of a simulation of a supply system	162
11 : Appendix - Scenario Tables.....	173
12 : Appendix - Weekly Figures of the Results of the Simulation	176
13 : Appendix - Nominal Monthly Hydropower Output.....	229
